## Management and technology consulting

*Specializing in telecommunications networks with an emphasis on technology*

### General Services:

- **Virtual CTO** - Perhaps a full time Chief Technology Officer is too expensive for your company at this time. Consider a part time, on-demand "virtual" CTO
- **Board Support** - Most companies have a financial audit committee. How about a Director or Committee focused on technology and network issues?

### Targeted Project solutions:

- **Cost reduction** - Network capital and operating cost keeping you up at night? Let us help you find the right balance between capital, operating expense and revenue growth
- **Merger and acquisition due diligence and support**
- **Cyber Security** - build your network for your customers, not the bad guys...
- **Problem solving** - Customer complaints? Slow product introduction?
- **Capacity problems?** Let us help you with your network technology, organizational and process issues
- **Product development** - We can turn Marketing's product ideas into revenue producing reality, quickly!

**Engagement: Retainer or fixed fee.**

**Doug Carter**, Managing Member, has thirty five years experience in the business and technology growth of telecommunications companies serving in senior technical and general management in wireless, CLEC, ISP and satellite service companies.

- Member of the Industry Executive Subcommittee of NSTAC
- VP Technology, Clearwire
- SVP Engineering & Chief Technology Officer, XO Communications
- VP, Teledesic Global Communications
- SVP, AT&T Wireless Communications
- President, System Integration, Inc.
- Chief Technology Officer, MSI Communications

**Associates:** Isotropic is networked with associates around the world with extraordinary experience in telecommunications management consulting including **John Curran** who has twenty years experience in the business technology growth of Internet and telecommunications companies serving in senior technical management in data engineering, ISP and telecommunications companies
